electronica 2014 – our booth 138, Hall A5

## Our Sensor-Portfolio – Highlights

### RADAR SIGNAL CONTROLLER

- » Controller designed for smart evaluation of signals from radar front-ends
- » Complex FFT based signal processing
- » Evaluation board available
- » Applications:
  - Movement detection for lighting applications, building, automation, burglar alarm;
  - Door opener, Traffic control, Speed measurement

### HALL-EFFECT SWITCHES IN SOT23-HOUSING

- » 3-wire open-drain or 2-wire current output
- » SOT-23 package (JEDEC)
- » AEC-Q100 and ASIL-A-ready
- » Low power consumption
- » High ESD-performance (8 kV)
- » Applications: Automotive, Industrial, White goods, Contactless switches

### PROGRAMMABLE 3D-HALL-EFFECT-SENSORS

- » Measures Bx, By and Bz
- » On-chip signal processing
- » Calculates the angle out of two magnetic components
- » 12 bit ratiometric output (HAL372x)
- » 0.2 – 2 kHz PWM output (for HAL373x)
- » Applications: Linear and rotary movement detection, Non-contact potentiometer, E-bike

# NEW SMD POWER INDUCTORS FOR HIGH VOLTAGE/PISMHV & PISTHV SERIES

**PISM HV series**

**PIST HV series**

## FASTRON presents a new High Voltage Version

from the existing and popular SMD power inductor models PISM and PIST in the same size. Both, the new PISM HV and PIST HV are designed for higher voltages and voltage peaks up to 400VDC for modern Power Converter Topologies. Low coil resistance allows for high currents in typical power applications. PISM HV: L-range from 10  $\mu$ H to 2.2 mH, current up to 3.57 A PIST HV: L-range from 15  $\mu$ H to 10 mH, current up to 4.9 A

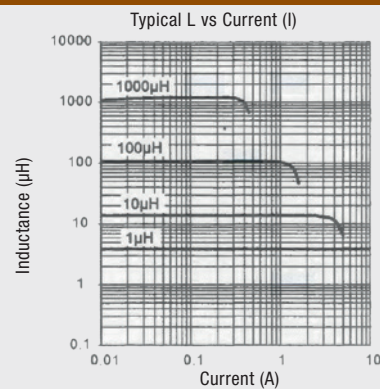

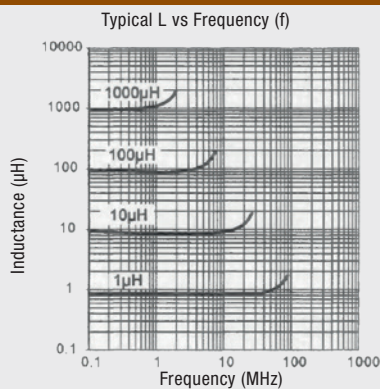

### DIMENSIONS – PISMHV-SERIES (mm)

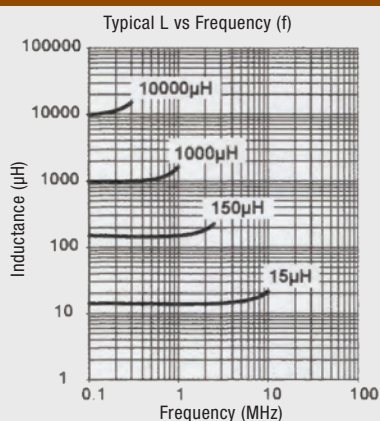

### DIMENSIONS – PISTHV-SERIES (mm)

### TYPICAL CHARACTERISTICS – PISMHV-SERIES

### TYPICAL CHARACTERISTICS – PISTHV-SERIES

## NEW SMD POWER INDUCTORS FOR HIGH VOLTAGE/PISMHV & PISTHV SERIES

### FEATURES

- » Designed for high currents
- » Suitable for use at high temperatures (+155°C incl. self rise).
- » AEC-Q200 qualified
- » Shock and Vibration proof

### APPLICATIONS

- » Automotive
- » Industrial
- » General electronics with high quality requirements

### SPECIFICATIONS – PISMHV SERIES

## RADAR SIGNAL CONTROLLER RSP1

### FEATURES

- » Universal Doppler Radar signal processor
- » Complete I/Q Radar sensor interface
- » Double detection distance compared to traditional solutions
- » Object speed and direction detection
- » Complex FFT based signal processing
- » Efficient adaptive interference suppression
- » Inherent object speed detection up to 135 km/h
- » Stand-alone or hosted operation
- » Serial interfaces to host processor

### TECHNICAL KEY DATAS

- » 12 Bit ADC
- » Differential analog inputs for I and Q signals
- » Internal programmable gain amplifier
- » Sampling rates from 1280 Hz to 22.5 kHz
- » Efficient 256 pt complex FFT
- » Logarithmic detection algorithms
- » Adaptive noise and interference analysis and canceling algorithms
- » Serial command and debug/streaming interfaces
- » Highly configurable by serial interface and/or digital and analog inputs
- » Application settings can be down- and uploaded from chip
- » Sophisticated serial outputs like peak magnitude, frequency and sign, noise level and many more

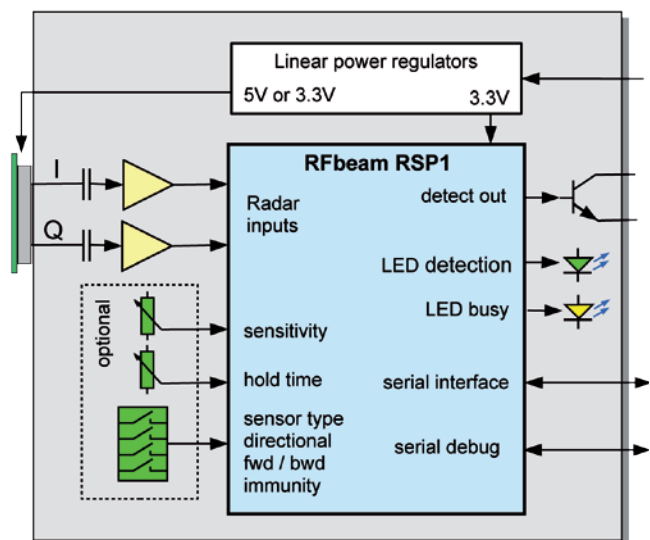

### RSP1 is a member of RFbeam Radar signal

processors. The RSPx family helps users concentrating on their application know-how instead of investing time and money in raw signal processing. RSP1 contains all signal processing for Doppler Radar. It covers slow movement detectors as well as speed estimators up to 200 km/h. It can be used as stand alone processor or as a co-processor in higher complexity systems. User has only to add an input amplifier and digital output drivers and gets a high performance detection system.

RSP1 is applicable for movement detectors, lighting control systems, security applications, object speed detection, etc.

### TYPICAL STAND-ALONE APPLICATION CIRCUIT

Typical applications need minimal external components. Configuration can be made by switches and potentiometers or fully digital via serial interface.

### RSP1-EVALUATION KIT

RSP1\_Eval-Kit; Left: K-LC2 sensor on front connector; Right: Backside equipped with K-LC6 sensor

With RSP1 Evaluation Kit, you may explore most features of RSP1 working with different RFbeam sensors. Using a RSP\_Terminal you have access to more than 30 parameters. Explore FFT, noise and other signals with the RFbeam SerialScope PC Software, that also makes part of the kit. All schematics, PCB layout and BOM are included as a reference.

# NEW PRODUCT OVERVIEW OLED-DISPLAYS

**Raystar Optronics** was established in Taiwan in 2007. Raystar specialises in the production of standard alphanumeric and graphic OLED displays as well as monochrome LC modules. In the last few years Raystar has succeeded in making a name in the Taiwan market as an OLED panel manufacturer.

### Raystar alphanumeric OLED displays

- » Mechanically and electrically compatible with alphanumeric LC displays
- » Sunlight readable technology available

## RAYSTAR OLED-DISPLAYS 0.95 " to 2.89 "

## NEW PRODUCT OVERVIEW OLED-DISPLAYS

**In the past 10 years RiTdisplay Corp.** has grown to a world market leader for passive OLED displays. The spectrum of these products extends from monochrome to full colour OLEDs.

Special optical qualities of the OLED displays are an extremely high contrast of 2000:1 and an unusually wide viewing angle of 160°. Most of the displays have in addition to the 8-bit parallel interface an SPI and I<sup>2</sup>C interface.

### RiT OLED-DISPLAYS 0.5" to 1.0"

## NEW HIGH PERFORMANCE OPTOCOUPLEDERS

**EVERLIGHT's 80V 4-pin optocouplers EL617, EL101X and EL121N combine high performance with a wide operating temperature range.**

**EVERLIGHT ELECTRONICS CO., LTD.**, a leading player in the global LED and optoelectronics industry, showcased its broad and growing infrared portfolio at electronica 2014 that includes infrared LEDs, photo transistors and photo diodes, infrared receiver modules, optical sensors, photocouplers and high speed couplers. A particular attention this year was given to three new high performance optocouplers **EL617, EL101X** and **EL121N** that combine a high breakdown voltage of 80V with a wide operating temperature range from -55 to 110°C which enhances system reliability.

EL617 and EL101X have a high isolation voltage of 5000 Vrms for improved insulation characteristics and a creepage distance of more than 8 mm which offer an advantageous combination of key specifications sought after by power supply designers. The EL121N with 3,750 Vrms targets DC-DC converters. Other applications include programmable controllers, measuring instruments, telecommunication equipment, home appliances and for signal transmission between circuits of different potentials and impedances. All three optocouplers are Pb-free, RoHS-compliant and VDE approved. Sampling and technical support are available now (upon request). Mass production starts in Q4/2014.

### SPECIFICATIONS

	TYPE	SHAPE	DIMENSIONS	$BV_{CEO}$	$V_{ISO}$	CTR	CREEPAGE DISTANCE	OPERATING TEMP.
